

Those who can see reality with the vision of faith have a responsibility to help those whose faith is weak or absent to at least turn responsibly to the natural voice of conscience that is written in their hearts – whether they even believe it is there or not. I call this “generic faith” – derived from the exact same source as the fullness of faith: GOD!

THIS IS COMMON GROUND:
the voice of conscience speaking!

Conscience is the guardian of the use of free-will so that it is fruitful and will end in happiness here on earth and eternal happiness in heaven!
